

YASH JADHAV

Mumbai, Maharashtra, India | yashj192006@gmail.com | +91 8767604204 | [linkedin.com/in/yash-iadhav07](https://www.linkedin.com/in/yash-iadhav07) | github.com/YASH859-hub

SUMMARY

AI/ML engineer with hands-on experience in machine learning, generative AI, LLM applications, and AI agents. Built AI-driven products and developer tools spanning repository intelligence, personal operations, and code vulnerability detection. Experienced with deep learning, RAG, LangChain, agentic workflows, data preprocessing, model evaluation, and full-stack AI product development.

EDUCATION

B.Sc. in Artificial Intelligence & Machine Learning — Elphinstone College, Mumbai *Expected 2027*
Semester 1 SGPA: 9.55 (O) | Semester 2 SGPA: 10.00 (O) | Semester 3 SGPA: 9.73 (O) | Semester 4 SGPA: 10.00 (O)
Class XII: 65.67% — Ramniranjan Jhunjhunwala College | Class X: 85.40% — St. Francis Xavier's High School

TECHNICAL SKILLS

Languages: Python, SQL

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, RAG, LangChain, AI Agents & Agentic Workflows, Predictive Modeling, Prompt Engineering, Model Evaluation

Data & Tools: Pandas, NumPy, scikit-learn, SQLite, DBMS, Git, GitHub, VS Code

Core: Data Structures & Algorithms, OOP, SDLC, Problem Solving

EXPERIENCE

Machine Learning Intern — FlyRank AI *Jul 2026 – Present*

- Working on applied machine learning problems, model development, evaluation, and AI/ML engineering workflows.
- Applying machine learning concepts to practical projects and contributing to development of AI-driven solutions.

Artificial Intelligence Intern — Codec Technologies *May 2026 – Jun 2026*

- Developed ML applications in Python, performing data preprocessing, model evaluation, and testing for analytical and business-oriented use cases.
- Documented project implementation processes to support reproducibility and team handoff.

Data Analytics Virtual Experience — Datacom (Forage) *Feb 2026 – Apr 2026*

- Completed a professional job simulation analyzing datasets to surface trends and actionable business insights, with stakeholder-ready reporting.

PROJECTS

AI Code Vulnerability Detector — github.com/YASH859-hub/AI_CODE--VULNERABILITY-DETECTOR.git

- Built an ML-based C/C++ source-code vulnerability detector using engineered code-risk features and deep-learning workflows.
- Implemented preprocessing, risk-feature extraction, XGBoost baselines, CodeBERT tokenization, SHAP explainability, and precision/recall/F1 evaluation.

REPOBRAIN – Repository Intelligence Engine — github.com/YASH859-hub/RepoBrainOS.git

- Built a codebase intelligence engine that maps repositories into dependency graphs for architecture reasoning and blast-radius analysis.
- Used Tree-sitter parsing, symbol tables, NetworkX knowledge graphs, CLI workflows, and local LLM tooling.

Nexora – AI Personal Operations Workspace — github.com/YASH859-hub/Nexora---Hackcartel.git

- Developed an AI-assisted personal operations workspace using React, TypeScript, Supabase, Gemini, Express, and Twilio.
- Implemented commitments, event-priority intelligence, AI summaries, document vault workflows, and Google Form automation.

CERTIFICATIONS & LEADERSHIP

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Google Student Ambassador 2026, Elphinstone College – led AI/developer community workshops and hackathon initiatives
- Python Certificate; Intro to Machine Learning Certificate; Datacom Data Analytics Virtual Experience
- Participant: TechTava Hackathon, HackCrypt – Cosmic Cypher, SummerHacks 2026
